

# How receptive have physicians been to AI so far?

MD Analytics asked physicians about their current usage of AI and their perceptions.

Despite all physicians having heard of AI, very few actually use it in their everyday practice.

● Somewhat familiar ● Very familiar

**US**

Familiar with overall concept of AI

Primary Care Physicians/  
General Practitioners

Specialists

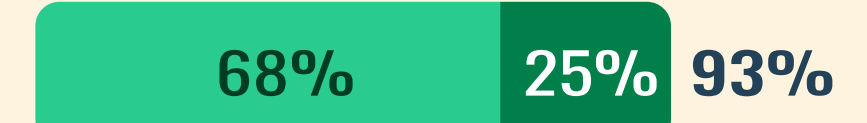

Use of AI LLMs such as ChatGPT for professional purposes

**Canada**

Use of AI LLMs such as ChatGPT for professional purposes

0% 100% 0% 100%

For now, physicians need to learn how to properly use LLMs and they are not fully comfortable with them.

Reasons why physicians are **unlikely to use** AI for professional purposes in the future:

Primary Care Physicians/  
General Practitioners

Specialists

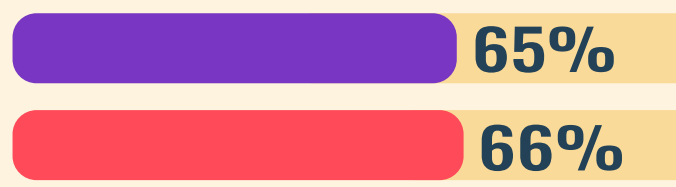

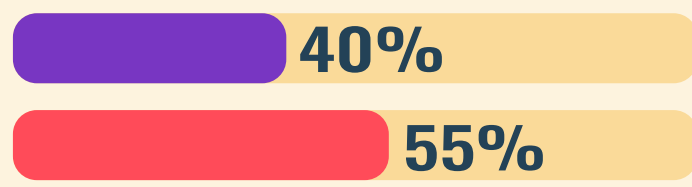

I am **not fully comfortable** using these platforms

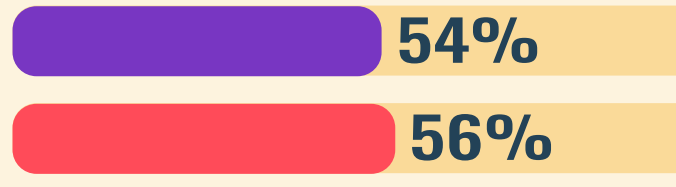

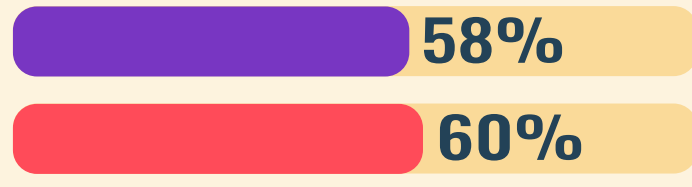

I first **need to learn** how to properly use these platforms

Moreover, with patients likely to increasingly get information from LLMs, physicians are concerned about having to spend more time addressing potential patient misconceptions.

Physicians are concerned that ...  
Top 2 Box

Patients will **self-diagnose** more so than before, using AI LLMs

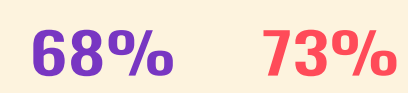

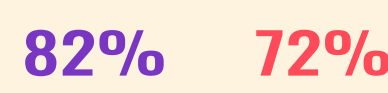

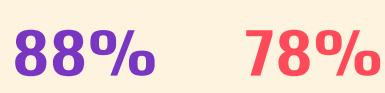

Patients will **misuse** AI LLMs

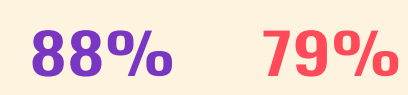

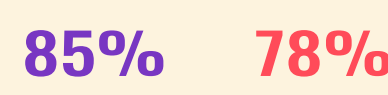

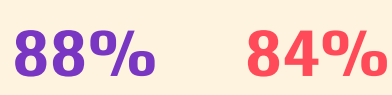

They will have to spend **more time** addressing patients' misconceptions they read on AI LLMs
