

## Use of Real-World Evidence in Oncology

The majority of oncologists say they at least occasionally rely on real-world evidence (RWE) to inform their current practice. Among those, approximately half say they rely on RWE often or almost always.

Oncologists agree that RWE plays an increasingly important role, particularly as:

Treatment options become more complex

US	89%
Canada	92%

It helps guide treatment decision-making in their own practice

US	86%
Canada	84%
0%	100%

## Reasons for using RWE

Specific indications and situations

To understand trial data and efficacy

12% 26%

O.

Safety and tolerability

12% 16%

Ease in diagnosis and guideline processing 16% 5%

US

## Among oncologists who rely more on RWE, the most common challenges include:

Interpreting data
81% 76%

100% 100%

Potential poor data quality 77% 74%

100% 100%

Getting access to RWE
68% 74%

100% 100%

Data based on survey of Oncologists in the US (n=100) and Canada (n=50) recruited in March 2025.
